Electronic Recording (E-recording) your documents saves time and increases productivity. Your papers are submitted thru a Vendor right from your office and the recorded copy is returned to you immediately after processing. Should there be a problem with the paper, you are notified immediately, corrections can be made and re-submitted, and the paper goes on the same day. With all the new title standards we certainly feel e-recording your documents is the way to go. We are averaging 60% of all documents that come into our office are now submitted thru e-recording. We would love to see that number increase even more.

Set out below is a list of our current submitters and their contact information. Any questions about the process can be directed to them, or of course, you can call my office at any time and we can share with you how it works on our end. We are certain that once you try it, you will love it, and never look back. Thank you!
