What’s New?

- The WI Department of Health Services (DHS) updated their travel guidance with information on travel within Wisconsin, recommendations for staying safe if you decide to travel despite recommendations to stay home, and what to do after you return from travel.
• DHS urges Wisconsin residents to stay home and follow best public health practices during the upcoming Fourth of July weekend. Wisconsin has seen a recent surge in cases with half of all positive cases coming within the past five weeks. Nearly 20% of total COVID-19 cases in Wisconsin have tested positive within the past two weeks. This spike in cases is driven in part by an increase in infections among younger people, and contact tracing by some local health departments has revealed that many of these cases can be traced back to bars. DHS recommends all residents, including young individuals, take more precautions such as staying home, physical distancing, and wearing cloth face coverings whenever possible. As the weather continues to improve, DHS encourages Wisconsinites to consult guidance on how to participate in summer activities safely, which can be found on the DHS Avoid Illness webpage.

• DHS has posted guidance related to public bathrooms. This guidance identifies behaviors to lower the risk of catching or spreading the virus, provides additional recommendations for using a public restroom, and lists key strategies for maintaining bathroom facilities during the COVID-19 pandemic.
  - Guidance for the general public is posted on the COVID-19 Avoid Illness page
  - Guidance for facility managers is posted on the COVID-19 Community page
